

# Protect Your Garden From Invasive Species

## Manage Invasive Plants

Take steps to control or remove invasives from your garden.

## Compost With Care

Take care when disposing of all garden material.

## Avoid Wildflower Mixes

Reduce mowing to let native wildflowers grow.

## Know What You Grow

Don't plant known invasives.

## Make Biosecurity Part Of Your Routine

Keep new plants in a quarantine area away from other plants until you are sure they're free of invasives.

## Stop The Spread

Keep plants that spread by rhizomes, in containers to prevent them spreading.

## Prevent Invasives Escaping From Your Pond

Contain and dispose of pond plants responsibly and never release pond animals into the wild.

## Watch Out For Flatworms

Check damp, dark place such as underneath wood, stones, plastics and plant pots for invasive flatworms.
